Practical Use of the FIDIC 1999 Editions Providing Essential Contractual Know-How for Working on Future International Projects

OVERVIEW

The 1999 FIDIC Conditions of Contract are being increasingly used by the international Construction Industry throughout the World. In Europe they are used by the European Commission for all their projects throughout Central and Eastern Europe. The Multi-Lateral Development Banks, including the World Bank, Islamic Bank for Development and the Asian Development Bank have adopted the 1999 FIDIC Conditions of Contract for Construction with modifications. These are covered in this course.

This practical training course, provided by professional engineers with extensive international experience, explains and illustrates the use of the FIDIC Conditions of Contract for Construction (the “Construction Contract”) and the FIDIC Conditions of Contract for Plant and Design-Build (the “Design-Build Contract”). The course is designed to help the participants have confidence in working with these documents whether representing Employers, Consultants or Contractors. Throughout the course work exercises are provided to assist the delegates in the application of the FIDIC Clauses
