All too often, when disaster strikes, remediation tends to take a fast-track, quick-fix solution. Is there a more sustainable approach? Can FIDIC's Project Sustainability Management lead to better solutions?

Come and learn from practitioners with hands-on experience who will demonstrate that even in disasters, sustainability can apply. This is one of eight value-packed workshops not to be missed. Sustainability pays.

China welcomes foreign involvement

The Mayor of Beijing will welcome delegates to a special day event being held at the Beijing Hotel conference venue on 8 September. Four major investment projects planned in China will be showcased.

Although an optional extra, this special event offers real examples of significant opportunities in infrastructure investment and will be of considerable interest to all those who are looking at market opportunities in China.
