

Standards and Guidelines: Agenda 21 for Sustainable Construction in Developing Countries

www.cibworld.nl/site/programme/priority_themes.html

Summary

Helps to provide an understanding of the challenges of sustainable construction in developing countries. The aim is to guide international and national investment in research and development in developing countries and encourage learning.

Owner: International Council for Research and Innovation & UNEP International Environment Technology Centre

Type					Themes			
Strategic	Management reporting	Design or data specific	Assess./indicator framework	Standards	General sustainability	Carbon / climate	Sector Specific	Other
Country	International (developing countries)			Development	The intention of this document was to create a global framework and terminology to inform national, regional and sub-sectorial agendas, create an agenda for CIB activities, and to provide a source document for defining research and development. Note there is also a document: Agenda 21 on Sustainable Construction, published in 1999.			
Sector	Construction							
Published	2002							
Access	Free to download							
Target group / users	Stakeholders in the construction industry including clients, industry, regulators and educators.
