

Standards and Guidelines: Sustainability of Construction works (CEN/TC 350)

www.cen.eu*

Summary

CEN/TC 350 is responsible for the development of voluntary standardised methods for the assessment of the sustainability aspects of new and existing construction works and for standards for the environmental product declaration of construction products. There are several European Standards related to sustainability assessment of buildings. Some are already published and others are under development.

*go to "Sectors" tab, then "List of Technical Committees, Workshops and other bodies"

Owner: European Committee for Standardisation (CEN)

Type					Themes
