

Summary

A reporting framework that allows companies and organisations to monitor and report sustainability performance. The reporting framework includes sector-specific supplements for: power; aviation; mining & metals; construction & real estate; oil & gas.

**Owner:** Global Reporting Initiative

Type					Themes			
Strategic	Management reporting	Design or data specific	Assess./indicator framework	Standards	General sustainability	Carbon / climate	Sector Specific	Other
<b>Country</b>	International			<b>Development</b>	The Global Reporting Initiative was founded in 1997 in the USA. It now has a global reach. The first version of the guidelines was launched in 2000. Thousands of reports from reporting organisations are available in a free database on the GRI website.			
<b>Sector</b>	Not specific to infrastructure. Includes sector specific applications.							
<b>Published</b>	Current version: G4 May 2013							
<b>Access</b>	Free to download							
<b>Target group / users</b>	Companies and organisations			<b>Key sustainability themes</b>	The main economic, environmental and social categories consist of a variety of aspects to include in reports. The social category is split into sub-categories (labour practices and decent work, human rights, society, and product responsibility) and has the highest number of aspects (followed by environment, then economic aspects).			

Note: "Free to download" does not necessarily imply that it is free for commercial use.
