Member of the Editorial Board, Construction Law International, International Bar Association.

My practice is devoted exclusively to international engineering and construction projects. My practice historically has been about evenly divided between representing: owners/developers/public agencies; architects/engineers/designers; and, general contractors and subcontractors.

The projects on which I have been involved have been both public and private projects, principally in heavy civil works, industrial projects, and hotel/resort developments. I enclose a list of representative projects.
