# **“Project and Contract Management under 1999 FIDIC Conditions of Contract (Construction/Design-Build)”**

---

## **OVERVIEW**

The training course is designed to provide practical guidance to those who are involved in managing or administration of projects where use of FIDIC forms of contracts is required. The course covers management disciplines and procedures in the Pre-Contract phase of the project including the FIDIC Client Consultant Service Agreement and selection of the appropriate FIDIC form of contract. The course also covers the post Contract award phase including all contract management disciplines and claim management issues.

It is suitable for all the Parties involved with a new FIDIC Contract – the Employer, the Project Manager, the Contractor, the Engineer, and the DAB Members. By having a good understanding of the FIDIC risk allocation policy and the resulting responsibilities and rights of the Parties under a 1999 FIDIC Contracts, a more efficient management of the project may be achieved. The tutors of the course are a very experienced German engineer and a German lawyer, who both have had extensive worldwide involvement with management of projects and related dispute resolution.
