

FIDIC Online Module 4 Training

FIDIC Contracts Management and Administration (2017 Updated FIDIC Forms)

Brief Description of the 2020 Course

This updated Module 4 online course is an **essential knowledge development opportunity** especially for all those, who are involved in the everyday **management of FIDIC contracts**. The course is designed to help the participants increasing their confidence in working with FIDIC's major construction contract forms whether representing Employers, Consultants or Contractors. The online course format includes all the features of the "normal" (conventional) subjects of the Module 4 FIDIC training, **focusing mainly on contractual mechanisms, project management features** of FIDIC's major contract forms – elaborating on the details of acceptable best practices. As all practitioners know, the **2017 FIDIC Updates** brought even **more contract administration** for the stakeholders – if you are one of those, facing such challenges soon, this is a course not to miss!

The completely updated online course is built upon the new 2017 FIDIC Forms, however, the sessions **highlight the main differences**, where the introduced features used to be different in **the 1999 Conditions of Contracts**. As usual, the sessions are concluded with a brief questions & answers part, providing opportunity for the participants to deepen their knowledge as they feel necessary.

The training programme will be delivered in **9 online sessions** on nine training occasions of approximately **1.5 hours duration** each. As part of this course the participants will be given **8 new case works / exercises to elaborate** and each session is started by discussing the solutions. The (average) time span in between the training occasions is two weeks, enabling the attendees to elaborate and discuss the case work solutions, all conveniently supported by the **Podio training platform** applied for the online course.

Note: As the course period encompasses the Northern Hemisphere summer holiday season, a longer break is planned in the course programme in order to allow participants enjoying their annual vacational leave.

Admission criteria: good understanding and speaking level of English, basic familiarity with the major FIDIC Contract Forms is of an advance.

Mentor:

Zoltán Záhonyi, FIDIC Accredited Trainer, Co-author of the 2017 FIDIC updates, past-chair of the FIDIC Contracts Committee

Certification

A Certificate of Successful Completion requires having responded in writing on Podio to all Case Works **and** attending at least half the live classroom sessions.

A Certificate of Participation requires having participated at least in 50 % of all activities.
